Sir,-In a late issue, you published extracts from letters from planters, touching the exactions they are subject to in the disposal of their produce. It is a hopeful sign to see men when in difficulty make searching investigations as to the reason why.

When they have discovered the cause of their trouble,

it is for their intelligence to devise a remedy, and for their manhood to apply it. There is no question about the stuff our planters are made of. The only thing wanting to them is cooperation. With that they would conquer the The captain and officers of the steamer Quinta position to which they are entitled.

For whom are they laboring? For themselves?

I think not. Not for them is the honey they make or the fleeces they bear. What they are toiling for goes to enrich others who enjoy the pastime of shearing the flock and gathering the sweets of the hive. Why should planters pay twice or three times the amount of wages to their laborers for which there is any necessity? Why should they be made to pay double the necessary cost for feeding their servants ! Rice can be laid down in Honolulu at three cents per pound after having paid one freight from India to Great British and another thence here, besides paying a duty of ten per cent; but by the levy of a duty of two and a half cents per pound, the price is artificially raised to the planter to six or seven cents per pound. Is this the way for planters to reap any

ed p , wasted, by the exorbitant and unnecessary portion of it ruling the country ? One of your contemporaries, in an excellent article, as far as it goes, is for making another effort to optain East Indians through the Government, and thinks it may be done through Mr. Armstrong, late Attorney-General, by instructions from the Board of Immigration. The writer of that article must be blessed with a very confiding nature. The writer of this was informed by a planter that Mr Armstrong had declared in his presence "that planters must work with Chinese and Portuguse." They were not

To the Editor of the Pacific Commercial Advertiser SIR-The Gazette of Wednesday last deprecates any criticism at the present time on the action or inaction of the authorities, which has resulted in the introduction of that dread disease-the small poxinto this community. It advises " action, prompt decisive action." That was just what was needed

alarmed at the spread of the disease to-day, and that in a mass meeting they should request the removal announced at first by languor and restlessness, of the present members of the Board of Health. When, on the arrival of the Hermine, from China, nearly a year ago, it was known that the small pox existed at the open ports of that country from which immigrants were coming here in crowds, it was plainly the duty of the Board of Health at once to have enforced the rule that all passengers coming from China should be kept in strict quarantine, outas aforesaid, who shall land or allow any such passengers or immigrants to be landed, and any person who shall rid and abet in the landing of any such passengers or immigrant without the permission and otherwise than in the manner as in the two preceding articles provided for, shall be liable to pay a fine not exceeding the sum of One Thousand Dollars, on conviction before any Police or District Magistrate.

(From the Wednesday Express, February 9.) "Worse than small pox." This was a remark made by by-standers as they gazed last Sunday through the picket fence into the Station House yard, at thirty-eight wretched lepers about to be forwarded to Molokai. These poor creatures presented an appalling spectacle, with their swollen disfigured countenances, and suppurating soressuch a spectacle as ought not to be presented to the open gaze of, and possible contact with, the well people of the city; and such a spectacle as take place, the rainy weather causing an unavoid- made it plainly apparent, that some retired place of detention, if only for a day or two, whilst awaiting an opportunity for shipment, was imperatively required.

Therefore, there is now presented a noble opportunity for our planters to prove some spirit of patriotism, or unselfish regard for the general welfare of the country in which they seek their wealth and find their protection, by belping to promote the repopulation of Hawaii nei, in providing for the the subsistence of a woman for every man they employ. This would be a nobler and more enlightened course than that pursued by planters generally in other parts of the world; but why should not little Hawaii present this nobler and more enlightened example?

"THE indiscriminate vaccination performed by non professionals in support of domestic economy has doubtless borne its share of sorrow to many a stricken bearth-stone." We quote these words from the valuable and interesting report of Dr. Neilson, resident physician of the Leper settle-ment on Melokai. We beg to correct the doctor by stating that "indiscriminate vaccination," was performed in past years (in 1853, the period we presume referred to) by professionals as well as non professionals; a fact which the doctor has not had an opportunity to know, in view of his short sojourn in the country. But we make the statement attested by several living witnesses, that Dr. Hillebrand and other physicians, in the year 1853, during the period of epidemic small pox in these islands, did vaccinate in a way that may be termed indiscriminate, by using seabs taken from the sores of vaccinated patients, -adults as well as children of both races,hence no doubt "Sorrow has been brought to many a stricken hearth-stone." Our physicians, aided by our authorities are doing better now, in the use of a genuine vaccine lymph, or bovine virue; and we have every reason to hope that the epidemic will only be attended in 1881 with a small fraction of the direful results which accompanied

its malignant presence in 1853 in Hawaii nei. 35 Saturday next being the Anniversary of His Majesty's accession to the throne will be a holiday a all Government offices. A salute of 21 guns will be fired from Punchbowl Battery at noon.

On Sunday night thirty-eight lepers were suddenly sent away to Kalawao, from the Police Station here, it being abs dutely necessary to have the premises cleared at once in consequence of the outbreak of the small pax epidemic in the city. In onsequence of the forced suddenness of the move. nany of these unfortunates were unable to take farewell of their friends. This circumstance is another proof of the nigent need of a proper respital or house of detention for lepers at Hono-
